

THE POWER OF BICYCLES

World Bicycle Relief is a charity which builds and gives strong, special bicycles to people living in developing countries like Zambia, Kenya and Malawi.

We want to help people travel so they can live happy, healthy lives.

We have given more than **500,000** Buffalo Bicycles to people who need them.

We believe in the Power of Bicycles!

THE BUFFALO BIKE

Our Buffalo Bike is named after one of the strongest animals in Africa. Most roads, where we work, are dirt tracks, with big rocks and stones in the dry season, which become slippery and flooded in the wet season.

A BUFFALO BIKE CAN...

Help farmers carry more food and earn more money.

Help nurses and doctors save more lives. They can travel further to visit more patients and help people who are sick.

Carry heavy milk churns, which help dairy farmers deliver more milk. **Before, they would walk and carry them on their head!**

Give people skills and jobs. Mechanics keep bikes rolling, so we train 1 mechanic for every 50-100 Buffalo Bicycles given away.

WHY?

More than **one billion** people living in the countryside around the world have no car to drive, or any buses or trains to catch.

Everyday tasks can be a big struggle.

Now that you know what a Buffalo Bicycle can do and how they help people, try drawing a sketch, painting a picture or making something about your favourite topic. **Enter online to win your creation printed on a T-shirt.**

Get children to school quickly and safely.

Some children walk for hours to get to school every day. Sometimes walking home tired, in the dark!

They now have more energy, so they learn more. They get home sooner, meaning they are safer.
